Short Biography:

My name is Miad Nakhavali. I am from Iran, living and working in Serbia. I received my PhD in international politics from the Faculty of political sciences in Belgrade, Serbia in September 2022.

I have been actively working on the Middle East issue, particularly the political issues of the Islamic Republic of Iran. For more than five years, I have collaborated with Save the Children and UNHCR, globally renowned NGOs, on the migration-related topics. I have worked as an OSINT and database analyst for Swiss-American company, Brasidas corporation. Currently, I am working remotely as a team leader in a company named IPSensus, whose headquarter is in Brussels, where we carefully check and examine Iran and Afghanistan trademarks. I am also working as an associate researcher at the Belgrade Centre for Security Policy, and my main task is to analyse the Middle East issues, particularly Iranian affairs.
